

# ROOS INSTRUMENTS, INC.

## Corporate Social Responsibility (CSR)

### 2024 Annual Report

Roos Instruments manufactures cutting-edge Automated Test Equipment for the semiconductor industry and leads the ATE sector with a robust Corporate Social Responsibility (CSR) management system. The company is committed to achieving ambitious environmental goals in line with Science Based Targets initiative (SBTi) standards.

Access to this and previous annual reports at <https://roos.com/green>

2024 Energy Facts	
GHG Scope 1 & 2:	52.2 tCO <sub>2</sub> -e
GHG Scope 3:	Identify and Minimize
Natural Gas:	2,309 Therms
Electricity:	156,613 Kilowatt Hours

<b>9. Energy and Natural Gas Annual Usage</b>	<b>11</b>

In 2024, Roos Instruments surpassed its target for reducing annual electrical usage but did not meet the natural gas reduction target. We continue to benefit from the reduced environmental footprint achieved through changes made in previous years. As we explore how to align our benchmarks with science-based targets, we remain committed to identifying risks and opportunities posed by climate change to further reduce our consumption.

We are proud to offer our flagship product, Cassini ATE, as one of the most energy-efficient automated test equipment available, helping our customers set higher standards in responsible semiconductor manufacturing. From 2005 until the municipal program ended in 2022, we purchased 100% green energy, which helped us achieve a higher standard of environmental responsibility and inspired us to take this commitment further. With the conclusion of the Santa Clara Green Power Business Program on December 31, 2022, this marks the second year that our electrical usage is not fully sourced from renewable energy or offset with Renewable Energy Credits (RECs) from that program.

“We view this initiative as a strategic investment in our future. Meeting our energy needs with clean power and reducing the energy footprint of our operations and products is both rewarding and essential for sustainable growth.”

-- Cathy Rossi-Roos, Roos Instruments COO.

# Accomplishments

## **18 Years of 100% Renewable Electricity**

**Since 2005 to 2022<sup>1</sup>**

Over 4.7 GWh of renewable energy has been purchased since 2005 from Silicon Valley Power, Green Power Supporter. The Santa Clara Green Power Business Program ended December 31, 2022.

## **Awarded Environmental Innovator 2010**

**Awarded 2011**

Silicon Valley Power issues the Environmental Innovation Award to organizations for “all around efforts to support energy efficiency and renewable energy.”

## **At Desk Recycling** - quarterly recycling, reduce waste, reuse components

**Since 2009**

Each desk has a dedicated recycling container, facilities staff empty weekly and reports "good to great" compliance and notifies individuals of incorrectly discarding recyclable material in a waste bin. Our vendor, Waste Management, switched from taking only paper and cardboard (separated) to accepting all forms of plastic, glass, aluminum, and paper in one container, increasing individual compliance.

## **Green Projects** - Ideas to improve energy conservation collected from staff

**Since 2012**

## **Reduce Travel** - Telecommuting and Virtual/Web Conferencing

**Since 2006**

## **Composting** – Food and soiled paper waste is collected for composting

**Since 2019**

**LED Lighting** – Replaced existing fluorescent lighting fixtures with modern lightening standards for brightness, installed motion sensors and replaced all fixtures with LEDs, to eliminate hazardous waste disposal activity and reduce energy use over the fixtures’ lifetime.

**Since 2020**

---

<sup>1</sup>Silicon Valley Power - Green Power Facilities - Green-e Energy Certified®

2022: 33.1% Eligible Renewable, 8.8% Hydroelectric, 23.3% Natural Gas, 34.8% Unspecified Power

<https://www.siliconvalleypower.com/sustainability/santa-clara-green-power/green-power-facilities>

# Goals for 2034

Science-based Target using the Absolute Contraction Approach using 1.5-degree scenario (1.5C).

	<b>Base year (2015)</b>	<b>Most recent Year (2024)</b>	<b>Target year (2034)</b>	<b>% Reduction to date</b>	<b>% FLA adjustment</b>	<b>% SBT reduction</b>
Scope 1 emissions (tCO2e)	13	17	2	----	Not required	84.0%
Scope 2 emissions (tCO2e)	142	22	18	84.5%	3.2%	87.2%
Scope 1+2 emissions (tCO2e)	155	39	20	----	2.9%	86.9%

Reduce annual consumption to 84% of “peak demand” set in 2015 at 142 tCO2e and choose renewable electricity sources, when available.

Focus on reducing total carbon dioxide equivalent (tCO<sub>2</sub>-e) including both Scope 1 and 2 sources. Identify Scope 3 sources and build an action plan on how to minimize and reduce all Scope 3 requirements.

## Planned Projects

- Maintain the facility’s energy reduction programs to meet goals.
- Cascading requirements - Vendor requests to voluntarily create their own reduction goals to support Scope 3 reductions.
- Strive for 100% recycling with facility staff identifies recyclable material that is recovered from waste bins prior to dumping.
- Increase energy efficiency of RI systems with software and hardware engineering related to supporting sleep and low power modes.

## Green Power Partners

The suppliers and customers identified in the tree illustration above have implemented a similar Corporate Responsibility and Environmental Management System. Thank you for helping Roos Instruments promote good environmental stewardship in the semiconductor industry.

# Green Projects

## RI Santa Clara, CA

Building Area: ~1820 m<sup>2</sup> (~19,600 feet<sup>2</sup>) , Constructed 1978

5,000 feet<sup>2</sup> updated 2007 with modern HVAC, 2022 with motion activated LED lights

The projects listed below contributed to reducing our GHG emissions.

Total Expected Annual Impact for All Projects in 2024: **40 Therms**

*Name of Project*

*Potential Impact<sup>2</sup>*

### **HVAC Efficiency Tuning and Maintenance (Ongoing):**

**40 Therms**

Assure optimum AC performance managed by Environmental Systems.

### **Other CSR Goals:**

- Reclaim Used Equipment: Any RI equipment can be returned to Santa Clara factory for recycling. Incentives like free shipping may be available. Published online [roos.com/contact](https://www.roos.com/contact), and on printed material like docs & service/training manuals.
- Maintain high recycling compliance with “unified” recycling bins located throughout the building that is used for plastic, aluminum and paper instead of separate bins.
- Supply “Green certified” office cleaner and post-consumer recycled paper products in restrooms and kitchens and environmentally friendly cleaning chemicals.
- Divert waste with composting collection bins.
- Support composting organic waste.
- Be mindful of water consumption and eliminate all unnecessary waste.

### **Vendor Letter and qualification:**

- Promote vendors who have their own environmental responsibility programs on our [roos.com/green](https://www.roos.com/green) page. Prefer “green” vendors by clearly marking them in our vendor contact databases to enable increased purchasing of equipment and services from preferred sources.

---

<sup>2</sup>Potential Impacts were computed with the following calculators:

EPA's [www.epa.gov/cleanenergy/energy-resources/calculator.html](https://www.epa.gov/cleanenergy/energy-resources/calculator.html)

CO2 Footprint Calculator: [www.carbonify.com/carbon-calculator.htm](https://www.carbonify.com/carbon-calculator.htm)

# Future Green Projects

*Name of Project*

*Potential Impact*

**Clean Living**

**Waste Reclaim**

Replacing all non-biodegradable products used in the break rooms like foam cups and plates to biodegradable ones.

**Sweater & Shorts Days:**

**400 Therms**

Wear warm clothing and leave temp down to 68 one day a week in Winter.

Wear cool clothing and leave temp up to 76 one day a week in Summer.

**Land Care:**

**Hazardous Material Reduction**

Mulching and using non-toxic chemicals for lawn maintenance.

## Employee Activities

**Recycle Program:** 100% of recyclable material is collected in dedicated bins.

**Composting:** Divert waste that is not recyclable but will compost to dedicated bins.

**Green Waste:** Recycle all electronics that are not in use, open with donations from home and the community.

**Annual Employee Training and Audits:** Carpool, how to reduce paper, proper tire inflation, etc...

**Support mobile workforce:**

**1,000 kWh**

Provide smart phones, laptops and other resources for mobile and remote offices.

**Web conference**

**Saving Estimated 2.91 Tons of CO<sub>2</sub>**

Instead of face-to-face meetings, use remote presence (video chat) for sales/support.

**Cascading CSR Notice**

**Reduce Scope 3 GHG**

Top 10 vendor CSR Questionnaire - Cascading requirement letter and questionnaire.

# Compliance Enforcement

All local and national environmental laws, regulations and contractual requirements are followed by ensuring that appropriate signs and labels are posted. Employees are notified of changes to requirements via email and are required to attend annual safety training programs appropriate to their tasks. All vendors are certified and approved legal operations, only verified if suspected of violations.

Projects are reviewed by assigned personnel and milestones used to show progress.  
OSHA - Computer Workstations & Material Safety Data Sheets (MSDS)

Employees are asked to complete the [Green Audit & Survey](#)  
RI Headquarters in Santa Clara is included in this program.

## **Safety Program**

All Employees should complete formal training including workstation ergonomics, lifting, emergency plans, and distracted driving. Employees working on the production of RI systems complete electronics safety, soldering iron, lighting, ventilation, and lead exposure training courses. Employees who regularly ship equipment must learn about back safety, maintaining a safe working environment (i.e. no cluttered floors) and proper lighting.

# Employee Training Resources

The Roos Instruments' new employee training presentation includes an introduction: "What is our CSR?", an Employee Survey/Audit, and mandatory minimum training. There will be a prize incentive to come up with a project that saves the most kWh or CO<sub>2</sub>. Carpooling is highly encouraged. The thermostat is not 72°F all year round; 74°F in warm months and 68°F in cold months, using personal heaters and fans to adjust for individual comfort. Employees sent newsletter including links to "[More Energy Saving Tips](#)" online. Posters from "[Recyclestuff.org](#)" remind employees where to recycle various items. [Local Government Programs](#) are used to educate and engage. Email newsletter includes topics like "[How to Reduce paper at work](#)" and "Dangers of distracted driving" OSHA's distracted driving brochure explains to employers and supervisors the importance of preventing texting by their workers while driving. Texting while driving dramatically increases the risk of motor vehicle crashes, the leading cause of worker fatalities.

## Disclosing Results

The Green Annual Report, this document, is published online at [roos.com/green](http://roos.com/green) and includes Roos Instruments' annual usage, goals, projects, analysis, and refinements needed to the Corporate Social Responsibility program.

**Fully Loaded Cassini 16**

**800 Watts**

# Greenhouse Gas (GHG) Emissions

Greenhouse Gas Emissions and Carbon Dioxide Equivalent (CO<sub>2</sub> -e) are calculated using the GHG Corporate Protocol standard<sup>3</sup>. Scope 3 GHG Emissions are being identified for future reduction goals. Includes carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulfur hexafluoride (SF<sub>6</sub>), and nitrogen trifluoride (NF<sub>3</sub>).

**Total Scope 1 & 2** **52.2 tCO<sub>2</sub>-e**

**Scope1: Generated by Roos Instruments**

Includes RI vehicles, refrigerators, HVAC systems, facilities, and landscaping.

Stationary: Natural Gas (CO<sub>2</sub> CH<sub>4</sub> Heating with Natural Gas): 2,309 Therms<sup>4</sup> 12.0 tCO<sub>2</sub>-e

Mobile: 2000 Tundra 4WD, 6 cyl, 3.4 L (CO<sub>2</sub> CH<sub>4</sub> Petroleum - Transportation)<sup>5</sup> 1.5 tCO<sub>2</sub>-e

Fugitive: 3 Office Refrigerators (HFCs Leaking Refrigerant)<sup>6</sup> 0.5 tCO<sub>2</sub>-e

Fugitive: 12 Air Conditioning Units (HFCs Leaking Refrigerant)<sup>7</sup> 0.4 tCO<sub>2</sub>-e

Process: Facilities (CO<sub>2</sub> Gas Lawn Care, Blower, etc.)<sup>8</sup> 0.2 tCO<sub>2</sub>-e

**Scope 1 Total:** **14.2 tCO<sub>2</sub>-e**
